Space and Naval Warfare Systems Command Awards Contract

Rolands & Associates, Incorporated* of Monterey, Calif., is being awarded a \$6,300,097 cost plus fixed-fee, Indefinite-Delivery, Indefinite-Quantity contracts for modeling and simulation work for the SPAWAR Naval Simulation System. The Naval Simulation System is meant to provide integrated modeling and simulation solutions to support distributed decision-making for the warfighter. The Naval Simulation System is an object-oriented, Monte Carlo, faster than real time, modeling and simulation program. NSS provides the warfighter a capability to make better informed decisions, re-engineer Course of Action planning, effectively allocate resources, and provide quicker response to crisis operations. NSS will be integrated into the Global Command and Control System – Maritime (GCCS-M) and available to Fleet planners both afloat and ashore. NSS explicitly accounts for critical C4ISR interactions across all Warfare Mission Areas and supports detailed analysis of performance along the "sensor to decision-maker to shooter" network. This contract includes options, which, if exercised, would bring the cumulative value of the contract to \$39,565,222. Work will be performed in Monterey, California and is expected to be completed by September 2004. The contract is being funded with an initial delivery order in the amount of \$12,000, all of which will expire at the end of the current fiscal year. This contract was competitively procured, with three offers received via the Space & Naval Warfare Systems Command E-commerce web site and two awards made. The Space & Naval Warfare Systems Command, San Diego is the contracting activity (N00039-01-D-2203).
